What makes tungsten one of the most useful elements?

Thomas Alva Edison is probably a familiar name to everyone. He was an inventor who is credited with the invention of light bulb.

After so many trial and error experiments with metal for the filaments, he came across a metal which was suitable for the bulbs. It was none other than tungsten.

Tungsten is most used for the filaments of light bulbs and other types of lighting, because it has the highest melting point of all the metals. It ranges in colour from a steely grey, to almost white.

Carl Wilhelm Scheele, a German Swedish Chemist, hypothesized the existence of tungsten in 1781. Two years, later Spanish Chemists, Jose and Fausto Elhuyar isolated tungsten.

The name tungsten comes from the Swedish Words "Tung, sten", meaning heavy stone. Tungsten is the heaviest of all elements known to play a biological role. Tungsten is resistant to attack by alkali, oxygen and acids. Production of tungsten is difficult due to its high melting point.

It has the atomic number 74 and its atomic symbol is W

The Symbol comes from its alternative name Wolfram used by German tin miners.

Does iodine Play a Significant role in the human body?

Iodine is a critical nutrient in human body and therefore it is an essential element for life itself.

Iodine is best known for the vital role it plays in thyroid hormone production in humans. Its deficiency can lead to serious health problems. Such as intellectual disability cretinism, which is a condition of severe stunting of physical and mental growth and goitre which is the abnormal enlargement of the thyroid gland.

Barnard Courtois, a French Chemist, discovered iodine in 1811. He named it iodine from the Greek word "iode", which means violet. In Vapour form, the element is violet in colour.

In solid form, the element is blue - black in colour. Iodine is fairly rare in both the earth's crust and in the Solar System. It is the 63rd most common element in the earth's crust. Iodine is soluble in Water and therefore it is found more abundantly in Oceans.

Iodine has several commercial applications and can be found in a variety of Pharmaceuticals, disinfectants, inks and dyes catalysts, photography chemicals and animal feed supplements. However, it plays, an important role in the production of Medicines. Most iodine production in the world comes either from the Chilean caliche, a mineral or from the oil field brines in the US.

The atomic number of Iodine is 53, and the Symbol is I.

K.R.G. Sathya, II B.Sc. Chemistry

The students listened to the lecture with rapt attention and got an overall understanding of American Literature.

மழை

காற்றிலே கலந்து வந்து
எங்கள் உள்ளங்களில் கலந்தாய்
மூச்சிலே மண்வாசம் தந்து
எங்கள் மனதில் புதைந்தாய்
வானிலிருந்து குளிர் பூக்களைத் தூவி
எங்களை வாழ்த்தினாய்
சில சமயங்களில் வெள்ளம் என்ற
இயற்கை சீற்றத்தைக் கொடுத்து
சிறு ஊர்களை வீழ்த்தினாய்
அவ்வேளையில் உலக
மக்களை ஒன்று கூட்டினாய்
மழையே உன்னை தெய்வமாய்
போற்றுகிறோம்!!!

குழந்தை

சின்னச் சின்ன அடி வைத்து
சிங்கார சட்டை அணிந்து
மழலை மொழி பேசி
காதினிலே தேனை பாய்ச்சி
சரியென்று தெரியாமல்
தவறென்று புரியாமல்
நீ செய்யும் செயலை வேடிக்கை
காணக் கண் கோடி வேண்டும்.
சின்னச் சின்ன புன்னகையிலே
என் மனதை மயக்கி
தவறேது செய்தாலும் திட்ட மனமில்லையே
மெல்லத்தான் அள்ளிப்போனாய்
எச்சில் உதடு பட்டாலும்
சொக்கித்தான் போனேன்
என் செல்லமே
கொஞ்சக் கொஞ்ச அகமே கூடுதே!!

DEPARTMENT OF CHEMISTRY

**A Report by
Dr. C.R. Yuvarajan
Head, Department of Chemistry,
Sourashtra College, Madurai.**

We have great pleasure in presenting the activities of the Department of Chemistry for the year 2018-2019.

The Chemistry association of our Department was inaugurated for this year by **Dr. Mothilal**, Head of the department of chemistry and controller of examinations, SN college, Madurai on 6.07.2018.

Our Department organized many special lectures for the benefit of students under UGC Autonomy Grant.

“Amazing aspects of Stereochemistry”	Mr.B.Servaramuthu Asst Prof. & HOD of Chemistry	Vivekananda College, Tiruvedakam West, Sholavandan
“UV- Visible Spectroscopy”	Dr. N. Somasundaram HOD of Chemistry	Rukmini Shanmugam Polytechnic College, Madurai
“Colloidal Chemistry”	Dr. R.Dhanalakshmi Asst. Prof. Dept. of Chemistry	Saraswathi Narayanan College, Madurai

The students were actively motivated and guided to participate in various seminars, conferences and competition programmes in various colleges in and around Madurai viz.,
